

We engineer our Fuel Senders to be reliable in all types of seas.

Royce Industries manufactures a wide range of durable Senders. Our all welded, stainless steel construction combined with our solid-state Flexi-Sensor insert offers an accurate continuous Fuel or Water reading. Our patented design allows for the Flexi-Sensor insert to be replaced without removing the sender from the tank. The insert can be removed with as little as 3" of headroom using simple hand tools. (See illustration below.)

Available in sizes starting at 5"

IMANNA & CE Approved

Specifications:

Stem Material	Mounting	Resistance Range	Float Material	Options
Stainless Steel	5 Hole Flange 1 1/2" NPT 2" NPT	30-240 ohms 0-90 ohms 0-180 ohms	Buna-N (Fuel) Polypropylene (water)	Custom Voltage output 1/2" Resolution (non-flexible) Calibrated (Non-linear Tanks) Dual Station Field Replacement Insert
