HoseCoil - Expandable Series

Expandable Hose Kits - Blue

The kit includes
two-tone nylon &
mesh storage bag

The Expandable Hose shrinks to one third of its length for ease of stowage and is built with double-layered rubber inner tube and durable Dacron outer cover. Dacron is known for its tough and abrasion resistant properties. The Expandable Hose easily coils and feels just like a quality 3/4" braided dock line. The kit includes a two-tone nylon and mesh bag and spray nozzle with rubber tip.

HoseCoil - Expandable Series

Expandable Hose Kits - Gray

The Expandable Hose shrinks to one third of its usable length for ease of stowage. It is built with double layered rubber inner tube and durable Dacron outer cover. Dacron is known for its tough and abrasion resistant properties. The Expandable Hose easily coils and feels just like a quality $\frac{3}{4}$ " braided dock line. The kit includes a two-tone nylon & mesh bag and spray nozzle. The nozzle has an adjustable rubber tip, trigger handle and rubber over-molded comfort grip.

(not included)

15'

15' HoseCoil Standard Series

Part# HS1500HP

Medium duty 3/8" ID HoseCoil

25'

25' HoseCoil Standard Series

Part# HS2500HP

Medium duty 3/8" ID HoseCoil

The 3/8" ID HoseCoil Standard Series features a 4" coil for ease of handling and a single strain relief for reduced kinking. Built with 3/4" garden style fittings, it fits all standard US hose connections.

All Coiled Hoses made with top-of-the-line, high performance Polyether material.

HoseCoil - Expandable Series

Side Mount Enclosure with Expandable Hose - 25'

Side Mount Enclosure with 25' Expandable Hose Kit

Part# HCE25SW-BLUE

Part# HCE25SW-GRAY

This Side Mount Enclosure is a great way to mount and store a 25' hose on your boat for cockpit washdown. This enclosure includes a 25' Expandable Hose with nozzle, and is designed to connect directly to your existing pressurized water system or raw water wash-down pump.

Dimensions: 11 3/4" W x 9 5/8" H

External Hose

Through Bulkhead

HoseCoil Gen3 Thermoforming

Gen3 Material Enhancements - A thicker gauge material that improves strength and provides better structural rigidity is now used. It is a custom co-extruded Acrylic-capped ABS sheet stock that we have specially made for us. The excellent UV stability of the Acrylic is combined with the durability of the ABS. The Acrylic cap protects the ABS from UV and its potentially damaging effects on plastic. We want to make sure that we use only the best material while producing a HoseCoil Enclosure for you. We thermoform HoseCoil Enclosures because it's the best way to produce a product with excellent high gloss retention.

Nickel Chrome-Plated Stainless Steel Screws - We use all 316 stainless steel hardware that is supplied with each enclosure. For Gen3 HoseCoil Enclosures we provide nickel chrome-plated stainless steel tamperproof screws for security combined with a long lasting shine.

Reconfigurable Shutoff Valve - For a clean installation we recommend mounting through the bulkhead to cleanly connect to a designated washdown pump or into the boat's fresh water plumbing system below decks. The valve can also be reconfigured to exit the bottom of the enclosure. This will allow convenient access to an external spigot in the cockpit. A 1/2" feeder hose to connect the Shutoff Valve to the external spigot is not included. The shutoff feature is important for two reasons. First, water pressure needs to be removed from the expandable hose in order for the hose to shrink to its original size before it can be stowed back into the enclosure. Second, it is important to have a physical shutoff for source water when not plumbing to a designated washdown pump with its own electrical shutoff switch. In the event you would like to remove or replace the hose, simply turn the shut off switch on the valve and unscrew the hose from the fitting.

HoseCoil - Expandable Series

Side Mount Enclosure with Expandable Hose - 50'

50'

Side Mount Enclosure with 50' Expandable Hose Kit

Part# HCE50SW-BLUE

Part# HCE50SW-GRAY

This Side Mount Enclosure is a great way to mount and store a 50' hose on your boat for full boat washdown. This enclosure includes a 50' Expandable Hose with nozzle, and is designed to connect directly to your existing pressurized water system or raw water washdown pump.

Dimensions: 14 3/4" W x 9 5/8" H

HoseCoil - Coiled Series

Side Mount Enclosure with Coiled Hose

15'

**Side Mount Coiled Enclosure
with 15' Coiled Hose And Nozzle**
Part # HC15S

The Side Mount Enclosure is constructed of durable, high density ABS and is popular for mounting a 15' Coiled Hose with barbed through-bulkhead fitting in the cockpit. This enclosure includes a $\frac{3}{8}$ " ID 15' HoseCoil with a nozzle and hardware to connect directly to your existing pressurized water system or raw water washdown pump. Dimensions - 8"W x 15"H

HoseCoil - Coiled Series

Flush Mount Enclosure with Coiled Hose

**Flush Mount Enclosure
with 15' Coiled Hose And Nozzle**
Part # HC15F

The Flush Mount Enclosure is designed to mount into the deck or bulkhead. The enclosure is supplied with hardware that will allow you to connect to the boat's pressurized water system or washdown pump. The Flush Mount Enclosure has a clear housing for easy inspection and a brass fitting on the bottom for attachment of a drainage hose. Includes a 3/8" ID 15' HoseCoil and nozzle.

Dimensions - 8" diameter x 13" depth

Requires a 6 3/4" cut out and 13" below deck clearance.

PETG housing material

- Extremely durable
- See-through for easy inspection

15' High Performance HoseCoil

- High Quality Polyether Material
- UV resistant
- Quick recoil for easy storage
- Brass, long-life fittings

Tight O-ring Seal

- High quality seal for tight fit

Polyethylene Lid

- Easy-to-use locking latch

Brass Twist Nozzle

- Positive shutoff
- Variable flow rate
- Rubber tip for protection

Brass Bulkhead Inlet Fittings

- 3/8" diameter for better flow rate
- 3/8" barbed fitting

All Coiled Hoses made with top-of-the-line, high performance Polyether material.

HoseCoil - Coiled Series

Horizontal Mount Enclosure with Coiled Hose - 25'

**Horizontal Mount Enclosure
with 25' Coiled Hose and Nozzle**
Part# HC25H2

The Horizontal Mount Enclosure is constructed of durable, high density ABS. The enclosure includes a 3/8" ID 25' HoseCoil and nozzle, and can be plumbed directly into your existing pressurized water system or raw water washdown pump. Also includes a 5' feeder hose for connecting to an external water spigot.

Dimensions - 20.5"W x 9.5"H
