THREAD MATERIAL OVERVIEW

POLYESTER

Best Choice for Outdoor Projects

Polyester is the most common choice for outdoor applications. Perfect for sail and canvaswork, polyester thread has high strength and stretch control, stability in sunlight (UVR) and resistance to needle heat, abrasion, saltwater and mildew. Use a lighter weight polyester thread in sewing machines that struggle in heavy canvas.

PTFE/FLUOROPOLYMER

Lasts a Lifetime

PTFE and fluoropolymer threads (Sailrite® Lifetime Thread and Tenara®) come with a lifetime guarantee. These are the best threads to use for outdoor applications where your projects will see frequent, intense sun or other weather extremes. These threads are unaffected by exposure to UV rays, cleaning agents, pollution, saltwater, air, rain and snow. These threads are an excellent choice for awnings, biminis, boat covers and more.

NYLON

Perfect for Upholstery

Nylon threads have excellent elasticity, which makes them the perfect choice for upholstery projects. When you sit on a seat, you want the thread to be able to give and rebound under your weight. Nylon is excellent for indoor upholstery, automotive upholstery, luggage and more.

MONOFILAMENT

Clear Thread for Hidden Stitches

Monofilament thread is a clear, strong nylon thread that blends in with fabrics. This thread sews well, and comes in three sizes. Use #18 for quilting, stretchy or heavy garments, and tacking and binding stitches; #40 for fine leather goods and upholstery; and #52 for binding and serging carpets and for upholstery.

6 QUICK TIPS ABOUT THREAD SIZE

- #1** V-69 is the heaviest commercial size recommended for home sewing machines.
- #2** Heavier threads make your stitching more visible.
- #3** The thread size indicates the thread's thickness. If another weight is given for thread (like ounces), it refers to the amount of thread on the spool.
- #4** Thread tends to get stronger as it gets thicker.
- #5** The tension on your sewing machine will need adjusting when you switch thread weights.
- #6** Try to use a needle where the eye is 40% larger than the thickness of the thread.

THREAD SIZES

THREAD SIZE	GOV. SIZE	TEXTILE SIZE	BREAKING STRENGTH	NEEDLE SIZE	FABRIC WEIGHT REC.
Coats® Dual Duty XP Poly	N/A	N/A	N/A	#10 or #12	< 6 oz.
Coats Extra Strong® Nylon	N/A	N/A	N/A	#18	3-6 oz.
