ISM INTELLIGENT STEERING MODULE

The industry first steering wheel to use a fixed keyboard system to prevent keyboards from turning together with the steering wheel (patented technology: PCT/IB2015/052111).

The functions which can be controlled directly from the steering wheel are limitless: every command can "migrate" from its current position directly to the keypads integrated into the steering wheel.

The system is designed to connect to any CAN - RS485 - RS232, digital I/O, and is geared for further expansion depending on the customer's specific needs.

Our patented system guarantees multiple innovations at the same time:

- It allows the steering wheel to turn while keeping the keyboard in a fixed position, making it possible for the pilot to interact with the buttons quickly, practically and safely and keeping them from turning together with the steering wheel.
- It enable users to connect the steering wheel and the boat using a CAN/BUS cable. As it does not require a wireless connection, it ensures the arrival of extremely secure and reliable electrical signals from the steering wheel itself, making it possible to control sensitive functions, such as motor speed and cruise control, as well as trim control, radio, flaps, ballasts, and all those functions whose controls are currently located on the dashboard of the boat.
- The keyboards are directly connected to the battery of the boat and therefore they will never run out of charge, unlike independent keyboards using wireless connections.

SPORT PADDLES

- Projected to allow precise and rapid control of engine trim, jackplate, trim tabs and other components
- Electronic microswitches IP67 activable by simply pulling paddles, with immediate response of all components and perfect feedback.
- External Control Unit for an intelligent data processing
- Usable in replacing of the original switch controller or together with it
- Ergonomic-design to ensure comfortable feeling without taking your hands off the wheel
- Central fitting body with a limited overall dimensions for a better look design and perfect integration with steering wheel
- Adjustable two-side arms positioned along the helm to cover and protect all wires between paddles and dashboard
- Suitable for most steering helm and pump thanks to the universal fitting system.
- Nominal switching capability 20 Amp @ 14VDC resistive load
- Custom boatbuilder logo and icons available on each paddle
